

Superstition Wilderness Water Report – Spring 2007

Courtesy of Scott McBride –National Forest Service

The following springs are sources that have shown to be reliably present during the driest periods over the past 4 years. When in doubt, carry at least 1 gallon per person per day.

West End

- Bluff Spring - Foul smelling out of pipe
- Charlebois Spring - Use flowing water trough
- Dripping Springs - Pools
- E. Boulder Canyon - Pools
- Hackberry Spring - Slow drip from pipe
- Kane Spring - Pool
- La Barge Spring - Small pools and trough
- Second Water Spring - Pools
- Whiskey Spring - Small pools

East End

- Campaign Creek - Flowing near trailhead
- Brushy Spring - Pools
- Paradise Spring - Small pools
- Plow Saddle Springs - Small pools
- Reavis Creek - Flowing, esp. near Fireline Trail
- Javelina Spring - Small pools
- Oak Flat - ¼ mile East of the corral in streambed
- Roger's Spring - Water trough or follow pipe to spring
- Walnut Spring - Pool
- Tony Ranch Spring - Dripping from pipe

Please report if you find a water trough not functioning (Charlebois) or to suggest changes to the above information.

Please Remember:

- Purify all water to be certain it is safe for drinking.
- Preserve our water sources by keeping human waste a minimum of 200 feet from streams, springs, and dry washes.
- Do not contaminate the water with leftover food, soaps, sunscreen or lotion.
- Respect wildlife and camp at least 200 feet from any spring.
